SUMMARY

Backend Software Engineer with **2+ years** of experience building **high-throughput, low-latency distributed systems** in **Go (Golang)**, **C++** at production scale (750B+ events/day). Proven track record delivering revenue-critical backend services in real-time bidding (RTB) and ad-tech infrastructure. Skilled in **microservices architecture**, **concurrent programming**, and **distributed systems design** with expertise in Kafka, Redis, Docker, and Kubernetes. Immediate joiner.

SKILLS

Languages: Go (Golang), Python, C++

Backend & Distributed Systems: Microservices Architecture, REST APIs, gRPC, Distributed Systems, High-Throughput Systems, Real-Time Bidding (RTB), Low-Latency Pipelines

Databases & Caching: Aerospike, Redis, MySQL

Messaging & Streaming: Apache Kafka, Event-Driven Architecture

DevOps & Infrastructure: Docker, Kubernetes, CI/CD, Git, GitHub, Jenkins, Linux, AWS

Observability: Grafana, Prometheus, Structured Logging, Latency Monitoring

CS Fundamentals: Data Structures & Algorithms (DSA), Concurrency, System Design, Object-Oriented Programming (OOP)

EXPERIENCE

PubMatic

Jul 2024 – Feb 2026

Software Engineer

Pune, Maharashtra

Money-Based Pacing Engine | Go, Aerospike, Distributed Systems

[View Certificate](#)

- Engineered a **high-throughput pacing engine in Go** handling **44+ currencies** for real-time budget allocation across **real-time bidding (RTB)** auctions at **750B+ impressions/day**.
- Built **concurrent pipelines** using **goroutines**, channels, and **Mutex**; leveraged **Aerospike** for sub-millisecond distributed state with **multi-datacenter XDR replication**.

Curation Service Fee Engine | C++, RTB, Large-Scale Distributed Systems

- Delivered revenue-critical backend service processing **750B+ impressions/day**, generating **\$170K+** incremental revenue; won company **Innovation Award**.
- Implemented **two-phase fee evaluation** (pre-RTB selection + post-RTB deduction) with **lock-free atomic config swap** for zero-downtime updates and buyer-specific fee APIs.

Observability, Performance & API Engineering | Go, C++, Grafana, MySQL, REST APIs, CI/CD

- Built **Grafana dashboards** for real-time monitoring across **microservices**; optimized **MySQL queries** by **~19%**; managed **production deployments** via **CI/CD pipelines** and **Git**.
- Delivered **Central Partner support**, **NetAcuity geo-field integration** (ACTIVATE DSP), and **Beeswax DSP PG deal recognition** backend features.

PubMatic

Jan 2024 – Jun 2024

Software Engineer Intern

Pune, Maharashtra

RTB Deal Debugging Framework | Go, C++, Distributed Systems

[View Certificate](#)

- Built a **distributed debugging system in Go** for **RTB deal flows** across **C++ AdServer** and **Go Translator** microservices; debugged up to **10 deal Meta-IDs** simultaneously under **750B+ impression/day** traffic with 1800s safety timeouts and auto-restart.

PROJECTS

Distributed Rate Limiter | Go, Redis, Docker

[GitHub](#)

- Implemented a **token bucket-based distributed rate limiter in Go** for high-concurrency systems using **Redis** for shared atomic state across multiple service instances.
- Built **concurrent request handling** via **goroutines and channels**; containerized the service with **Docker** and validated performance under simulated high-traffic workloads.

Real-Time Event Processing System | Go, Apache Kafka, Prometheus, Grafana, Docker

[GitHub](#)

- Built a **high-throughput event streaming pipeline in Go** with **Apache Kafka**, goroutine-based worker pools, backpressure handling, and retry logic.
- Integrated **Prometheus** and **Grafana** for end-to-end observability; simulated **production-scale event processing** with **microservices architecture** and **Docker** containerization.

EDUCATION

Sinhgad College of Engineering, Pune University

Feb 2020 – Jun 2024

Bachelor of Engineering (B.E.) – Computer Engineering

CGPA: 8.95 / 10

HONORS & AWARDS

Innovation Award – PubMatic

[View Certificate](#)

Built a **Gen AI-powered troubleshooting agent** for automated diagnostics; won among 50+ teams.

Special Accolades Award – PubMatic

[View Certificate](#)

Recognized for high-impact developer productivity solution at internal PubMatic hackathon.

Kavach 2023 Hackathon Grand Finalist – National cybersecurity hackathon by **AICTE & BPRD, Government of India**.

DSA & Open Source – Solved **400+ problems** (LeetCode, GFG, CodeChef).

GAIT GOLD Professional. Technical Lead at CodeChef SCOE Chapter.
